Summary

Computer Engineering student with hands-on experience building GenAI systems (RAG pipelines, LLM APIs) alongside strong fundamentals in Python, SQL, and core computer science.

Education

B.Tech., Computer Engineering Usha Mittal Institute of Technology, Mumbai	9.385 2023 - 2027
Senior Secondary (HSC) R P Jr College Of Arts, Science & Commerce	74.33% 2023
Secondary (CBSE) Rahul International School	92.40% 2021

Experience & Leadership

Data Science Intern Prodigy InfoTech	<i>Jul – Aug 2025</i>
• Performed EDA, data cleaning, and feature analysis across 5 datasets, building Python visualizations to identify and communicate actionable patterns.	
Content Strategist Google Developer Group (GDG), UMIT	<i>2025 – 2026</i>
• Designed and communicated developer-focused content and initiatives to a community of 200+ members.	
Social Media & Graphics Head SNTD ACM-W	<i>2024 – 2025</i>
• Grew chapter engagement by 40% and introduced 100+ students to technology through the Hour of Code '24 drive.	

Projects

Intervista – Adaptive Interview Intelligence Platform	<i>Feb 2026 - Ongoing</i>
<i>Python, FastAPI, LLM APIs</i>	
• Built an AI-powered mock interview platform to generate resume-aware, role-specific interview questions with automated response evaluation.	
• Implemented a Whisper-based speech-to-text pipeline for spoken interview responses and a contextual bandit RL layer to adapt question difficulty based on candidate performance in real time.	
Leaf Disease Detection – Deep Learning Image Classifier	<i>Oct 2025</i>
<i>Python, TensorFlow, MobileNetV2, Streamlit</i>	
• Developed a MobileNetV2-based plant disease diagnosis system achieving 94.44% accuracy across 15 disease classes using transfer learning.	
• Improved model performance by 11.75% over the baseline using a hybrid laboratory–field image dataset, and deployed a Streamlit application with camera support and treatment recommendations.	

Skills

Languages: Python, SQL, C++ (DSA)
Data & Tools: Pandas, NumPy, TensorFlow, Streamlit, GitHub
Core CS: Object-Oriented Programming, DBMS, Operating Systems

Achievements & Certifications

- **Microsoft AI Skills Fest 2026:** Earned the official Microsoft AI Skills Fest badge for completing AI learning and skill development activities.
- **HackFusion 2026** (IEEE UMIT & IEEE SPIT): Developed a travel-planning application with real-time itinerary generation during a 24-hour hackathon.
- **Best Project Award – ACM Summer School 2025:** Timelens VR, an AR/VR storytelling experience, was recognized for innovation in XR technology and user engagement.
