Summary

Computer Engineering student with hands-on experience building software and machine learning applications, with strong foundations in Python, SQL, data structures, and core computer science.

Education

B.Tech., Computer Engineering Usha Mittal Institute of Technology, Mumbai	9.385 2023 - 2027
Senior Secondary (HSC) R P Jr College Of Arts, Science & Commerce	74.33% 2023
Secondary (CBSE) Rahul International School	92.40% 2021

Experience & Leadership

Data Science Intern Prodigy InfoTech	<i>Jul – Aug 2025</i>
• Performed EDA, feature engineering, and statistical analysis across 5 datasets, building Python visualizations to extract and communicate actionable insights.	
Content Strategist Google Developer Group (GDG), UNIT	<i>2025 – 2026</i>
• Designed and communicated developer-focused content and initiatives to a community of 200+ members.	
Social Media & Graphics Head SNDT ACM-W	<i>2024 – 2025</i>
• Grew chapter engagement by 40% and introduced 100+ students to technology through the Hour of Code '24 drive.	

Projects

SplitApp – Collaborative Expense Management Platform	<i>Mar 2026</i>
<i>Python, FastAPI, SQLAlchemy, PostgreSQL, JavaScript, JWT</i>	
• Built a full-stack expense-splitting platform with JWT authentication, trip management, and equal, percentage, and exact-amount splits.	
• Implemented automated balance calculation, settlement simplification, idempotent transactions, and Alembic database migrations.	
Leaf Disease Detection – Deep Learning Image Classifier	<i>Oct 2025</i>
<i>Python, TensorFlow, MobileNetV2, Streamlit</i>	
• Developed a MobileNetV2-based plant disease diagnosis system achieving 94.44% accuracy across 15 disease classes using transfer learning.	
• Improved model performance by 11.75% over the baseline using a hybrid laboratory–field image dataset, and deployed a Streamlit application with camera support and treatment recommendations.	

Skills

Languages: Python, SQL, C++ (DSA & competitive programming)
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, CN
Data & ML: Pandas, NumPy, TensorFlow, NLP
Tools: Git, GitHub, Streamlit, Render

Achievements & Certifications

- **Microsoft AI Skills Fest 2026:** Earned the official Microsoft AI Skills Fest badge for completing AI learning and skill development activities.
- **HackFusion 2026** (IEEE UNIT & IEEE SPIT): Developed a travel-planning application with real-time itinerary generation during a 24-hour hackathon.
- **Best Project Award – ACM Summer School 2025:** Timelens VR, an AR/VR storytelling experience, was recognized for innovation in XR technology and user engagement.
