Summary

Computer Engineering student with hands-on experience building software, data, and AI applications using Python and SQL, with strong foundations in core computer science.

Education

B.Tech., Computer Engineering Usha Mittal Institute of Technology, Mumbai	9.385 2023 - 2027
Senior Secondary (HSC) R P Jr College Of Arts, Science & Commerce	74.33% 2023
Secondary (CBSE) Rahul International School	92.40% 2021

Experience & Leadership

Data Science Intern | Prodigy InfoTech [\[Certificate\]](#) Jul – Aug 2025

- Conducted data cleaning, EDA, and feature engineering across multiple datasets, extracting actionable insights through statistical analysis and visualization.
- Built interactive reports and visualizations using Python to communicate trends, correlations, and model insights.

Content Strategist | Google Developer Group (GDG), UMIT 2025 – 2026

- Collaborated with cross-functional technical teams to design and communicate developer-focused content and initiatives to 200+ community members.

Social Media & Graphics Head | SNDT ACM-W 2024 – 2025

- Grew chapter social media engagement by 40% & introduced 100+ students to technology through the Hour of Code'24 initiative.

Projects

SplitApp – Collaborative Expense Management Platform Mar 2026  [demo](#)
Python, FastAPI, SQLAlchemy, PostgreSQL, JavaScript, JWT

- Built a full-stack expense-splitting platform with JWT authentication, trip management, and equal, percentage, and exact-amount splits.
- Implemented automated balance calculation, settlement simplification, idempotent transactions, and Alembic database migrations.

Leaf Disease Detection – Deep Learning Image Classifier Oct 2025  [demo](#)
Python, TensorFlow, MobileNetV2, Streamlit

- Developed a MobileNetV2-based plant disease diagnosis system achieving 94.44% accuracy across 15 disease classes using transfer learning.
- Improved model performance by 11.75% over the baseline using a hybrid laboratory–field image dataset, and deployed a Streamlit application with camera support and treatment recommendations.

US Accidents Data Analysis – Large-Scale EDA Jul 2025 

Python, Pandas, Matplotlib, NumPy

- Performed exploratory data analysis on a 2 GB accident dataset to identify geographic and temporal accident patterns.
- Identified 5+ high-risk regions and peak accident intervals; generated insights supporting data-driven traffic risk mitigation.

Skills

Languages: Python, SQL, C++ (DSA)
Data & Tools: Pandas, NumPy, FastAPI, SQLAlchemy, Tableau, Streamlit, Git, GitHub, PostgreSQL
Web: HTML, CSS, JavaScript
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Cybersecurity Fundamentals

Achievements & Certifications

- Microsoft AI Skills Fest 2026:** Earned the official Microsoft AI Skills Fest badge for completing AI learning and skill development activities. [\[Badge\]](#)
- HackFusion 2026 - Hackathon** (IEEE UMIT & IEEE SPIT): Developed a travel-planning application with real-time itinerary generation during a 24-hour hackathon. [\[Certificate\]](#)
- Best Project Award – ACM Summer School 2025:** Timelens VR, an AR/VR storytelling experience, was recognized for innovation in XR technology and user engagement. [\[Certificate\]](#)
